# CLEAR BLUE WATER COLORANT

### **PRODUCT DESCRIPTION**

**CLEAR BLUE** is a concentrated blue-green dye solution that is used to impart an appealing blue color to natural and manmade, contained water bodies. It should not be applied to any water that is not under total control of the user, such as streams. It should not be applied to water that will be used for human consumption.

### **GENERAL DIRECTIONS**

Pour **CLEAR BLUE** from the container into the water near the shoreline. The color will mix uniformly throughout the body of water.

**NOTE:** The color imparted will slowly fade if applied to water that is treated with chlorine.

### **DOSE RATE**

One gallon (3.8 litres) of **CLEAR BLUE** will treat up to 2,000,000 gallons (7,500,000 litres) of water. This dose rate may be incrementally increased to yield a deeper blue color if the body of water does not contain fish.

### **SAFETY & HANDLING PROCEDURE**

This product is a mild irritant. It is recommended that safety glasses and impervious gloves be worn when handling the concentrated product. Avoid spilling product, as the concentrated dye solution will most likely stain the surface it contacts.
