**SURE FLOW® C**  
**THE BEST INVESTMENT YOU CAN MAKE**  
**FOR TODAY'S LOW-VOLUME IRRIGATION SYSTEM!**

**PRODUCT APPLICATION**

Drip and micro-jet irrigation systems are ideal for receiving the most use from each gallon of irrigation water. Unfortunately, plugging of lines and emitters causes such systems to require excessive maintenance and replacement costs.

**SURE FLOW® C** is a water treatment formula designed to reduce plugging of orifices and distribution piping. Protected systems stay cleaner. Clean systems stay open and flowing at designed rate. System maintenance costs may be greatly reduced and water pumps are protected from excessive operating pressure.

**SURE FLOW® C** helps remove mineral buildup from irrigation systems with existing mineral buildup. An initial feed rate will be recommended based upon water quality analysis. Once a system is free from deposits, a lower feed rate will help maintain the system. **SURE FLOW® C** is best added by continuous injection that is proportional to water flow rates. It is compatible with most fertilizers and soil building products. A simple test of mixing **SURE FLOW® C** with a small amount of fertilizer or soil builder is necessary to insure compatibility.

**SURE FLOW® C** is not a replacement for pH adjustment or problems caused by heavily silt-laden water. It will reduce problems related to the calcining of soil by water with high hardness content.

- HELPS CLEAN DIRTY AND/OR FOULED SYSTEMS
- HELPS MAINTAIN CONSISTENT WATER FLOW
- HELPS PROTECT PLANT FOLIAGE FROM MINERAL DEPOSITS
- IMPROVES PERCOLATION THROUGH CALCINED SOIL

*Untreated -Mineral Crystals vs. Treated -Amorphous Mineral **SURE FLOW® C** Water Treatment*

**SURE FLOW® C** incorporates synthetic sequestering agents which adsorb to deposits during precipitation. Solids formed in this manner are soft and easily flushed by normal water flow.

**SURE FLOW® C** components are listed in Title 21 CFR Part 173.310 - Secondary Direct Food Additives Permitted in Food for Human Consumption or Title 21 CFR Part 184 - Direct Food Substances Affirmed as Generally Recognized as Safe. They are also listed in the United States Environmental Protection Agency Report on Corrosion Control Chemicals for Water Treatment for use at levels up to 5 ppm.

**Seller Warranty**

Applies to all products sold by CH<sub>2</sub>O, Inc., and is hereby communicated to all of its customers as a condition of sale.

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose referred to in the directions for use when used in accordance with the directions under normal conditions. Buyer assumes the risk of any use contrary to such directions. Seller makes no other warranty or representation of any kind, express or implied, concerning the product, including **NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS OF THE GOODS FOR ANY OTHER PARTICULAR PURPOSE**. No such warranties shall be implied by law and no agent of seller is authorized to alter this warranty in any way except in writing with a specific reference to this warranty. The exclusive remedy against seller shall be a claim for damages not to exceed the purchase price of the product, without regard to whether such a claim is based upon breach of warranty or tort. Jurisdiction for any issues arising from or relating to this product shall be in the courts of the State of Washington and the venue shall be Thurston County. Any controversy or claim arising out of or relating to this contract, or breach thereof, shall be settled by arbitration in accordance with the rules and procedures as stated in RCW 7.06 and shall be binding upon both parties without right to appeal, and judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.
