

CH₂O's Quality Policy:

CH₂O, Inc. is committed to the development and implementation of a quality system that helps us to serve our customers and promotes continuous improvement. To meet this commitment we have selected the model outlined under the international standard, ISO 9001:2008.

In accord with this standard, our primary mission is to develop specialty chemicals and related equipment that meet defined criteria, and to consistently produce products within defined quality control parameters. Quality Objectives are established, and periodically reviewed at the quarterly QSRC meetings, in order to help us measure progress towards these goals.
